Determining Change - One Cost , Multiple Items

Name:

Solve each problem.

1) Gwen bought 3 boxes of candy canes at the Santa Store. If each box of candy canes cost $1.70 and she paid with a twenty dollar bill, how much change should she get back?

2) Lana bought 2 cases at the phone store. If each case cost $5.30 and she paid with a twenty dollar bill, how much change should she get back?

3) Janet bought 4 hamburgers at the state fair. If each hamburger cost $2.85 and she paid with a twenty dollar bill, how much change should she get back?

4) George bought 4 board games at the toy store. If each board game cost $4.45 and he paid with a twenty dollar bill, how much change should he get back?

5) Adam bought 4 soccer balls at the sports supply store. If each soccer ball cost $1.85 and he paid with a twenty dollar bill, how much change should he get back?

6) Emily bought 3 pencils at the school shop. If each pencil cost $0.65 and she paid with a twenty dollar bill, how much change should she get back?

7) Cody bought 3 cookies at a bake sale. If each cookie cost $0.85 and he paid with a twenty dollar bill, how much change should he get back?

8) Maria bought 4 books at the school book fair. If each book cost $4.35 and she paid with a twenty dollar bill, how much change should she get back?

9) Ned bought 4 bags of cherries at a fruit stand. If each bag of cherries cost $2.90 and he paid with a twenty dollar bill, how much change should he get back?

10) Bianca bought 2 bags of candy at the candy store. If each bag of candy cost $2.55 and she paid with a twenty dollar bill, how much change should she get back?
