

Toucans, with their big beaks and vibrant colors, are one of the most recognizable birds in the world! They have a unique appearance, with their oversized, colorful beak, black feathers, and bright eyes. But did you know that their beak, despite its size, is very light because it's hollow? And, they also have a small body and short, strong legs that make them excellent climbers!

Speaking of climbing, toucans love to hang out in the treetops of the rainforests in Central and South America. They make their home in the hollows of trees, often living in small groups or families. In these lush forests, they find their favorite food - fruits! But they also eat insects, eggs, and small animals when they can catch them.

Just like how toucans have a varied diet, their life cycle is equally interesting. After a pair of toucans build a nest, the female lays 2 to 4 eggs, which both parents take turns incubating. When the chicks hatch, they are blind and without feathers, but with the care of their parents, they grow quickly. In just a few weeks, these chicks are ready to leave the nest and explore the world!

Out in the world, toucans are pretty peaceful and don't have many enemies. Their bright colors blend in with the fruits and flowers of the rainforest, helping them hide from predators. Humans, however, pose a threat to them through habitat destruction and the pet trade. So, it's important that we learn about these amazing birds and do our best to protect them and their homes.

**Solve each problem.****Use the article to answer the question.**

- 1) Where do toucans make their homes?
 - A. On the ground, in nests made of sticks.
 - B. In caves on rocky cliffs.
 - C. In underground burrows.
 - D. In the hollows of trees in the rainforests.

- 2) What is the favorite food of toucans?
 - A. Fruits
 - B. Seeds
 - C. Insects
 - D. Nectar from flowers

- 3) When are toucan chicks ready to leave the nest and explore the world?
 - A. In just a few weeks
 - B. After one year
 - C. After a few months
 - D. After a few days

- 4) In what kind of groups do toucans usually live?
 - A. Alone
 - B. In pairs
 - C. Small groups
 - D. Large flocks

- 5) Who presides the incubation of the eggs?
 - A. Only the mother
 - B. Only the father
 - C. Neither, they are left alone
 - D. Both parents

- 6) How many eggs does a female toucan usually lay?
 - A. 2 to 4 eggs
 - B. 5 to 10 eggs
 - C. Over 20 eggs
 - D. 1 egg

- 7) What is the toucan's beak like?
 - A. It's oversized, dull and very heavy because it's solid.
 - B. It's oversized, colorful and very light because it's hollow.
 - C. It's small, dull and very heavy because it's solid.
 - D. It's small, colorful and very light because it's hollow.

- 8) What are some other foods that toucans eat?
 - A. Berries, bark, and flowers.
 - B. Insects, eggs, and small animals.
 - C. Seeds, nuts, and leaves.
 - D. Fish, frogs, and turtles.

- 9) Are toucans good climbers?
 - A. No, they can't climb at all.
 - B. They can only climb small, thin branches.
 - C. They can climb, but not very well.
 - D. Yes, they are excellent climbers.

- 10) Are toucan chicks born with feathers?
 - A. Yes, they're born with feathers.
 - B. No, they're born without feathers.
 - C. They're born with a full set of colorful feathers.
 - D. They have a few feathers, but they grow more after they're born.
