

Determine the number that will correctly balance each equation.

Answers

1) $18 + 27 = \underline{\hspace{2cm}} + 35$

2) $36 + 47 + \underline{\hspace{2cm}} = 138 - 6$

1. _____

2. _____

3) $18 + 39 = \underline{\hspace{2cm}} + 42$

4) $16 + \underline{\hspace{2cm}} = 7 + 18$

3. _____

4. _____

5) $53 - 46 = 20 - \underline{\hspace{2cm}}$

6) $7 + 45 + \underline{\hspace{2cm}} = 25 + 55$

5. _____

6. _____

7. _____

8. _____

7) $88 - \underline{\hspace{2cm}} = 12 + 44$

8) $\underline{\hspace{2cm}} + 24 = 24 + 32 + 6$

9. _____

10. _____

9) $\underline{\hspace{2cm}} - 26 = 40 - 7$

10) $\underline{\hspace{2cm}} + 24 = 28 - 2$

11. _____

12. _____

13. _____

14. _____

11) $37 - \underline{\hspace{2cm}} = 42 - 38$

12) $\underline{\hspace{2cm}} - 9 = 34 + 29$

13) $20 + 18 + \underline{\hspace{2cm}} = 114 - 32$

14) $101 - 3 = 16 + \underline{\hspace{2cm}} + 32$

Determine the number that will correctly balance each equation.

1) $18 + 27 = \underline{10} + 35$

2) $36 + 47 + \underline{49} = 138 - 6$

3) $18 + 39 = \underline{15} + 42$

4) $16 + \underline{9} = 7 + 18$

5) $53 - 46 = 20 - \underline{13}$

6) $7 + 45 + \underline{28} = 25 + 55$

7) $88 - \underline{32} = 12 + 44$

8) $\underline{38} + 24 = 24 + 32 + 6$

9) $\underline{59} - 26 = 40 - 7$

10) $\underline{2} + 24 = 28 - 2$

11) $37 - \underline{33} = 42 - 38$

12) $\underline{72} - 9 = 34 + 29$

13) $20 + 18 + \underline{44} = 114 - 32$

14) $101 - 3 = 16 + \underline{50} + 32$
