

Solve each problem.

Answers

- 1) A toy store had six giant stuffed bears in stock when they got another shipment with twenty-two bears in it. They put the bears onto shelves with four on each shelf. How many shelves did they use?
- 2) For Halloween Rachel received twenty-nine pieces of candy from neighbors and eleven pieces from her older sister. If she only ate eight pieces a day, how long would the candy last her?
- 3) A vase can hold six flowers. If you had ten carnations and forty-four roses, how many vases would you need to hold the flowers?
- 4) A group of five friends went into a restaurant. The chef already had two chicken wings cooked but cooked thirteen more for the group. If they each got the same amount how many would each person get?
- 5) At a company picnic seven managers and three employees decided to start a game of volleyball. If they split into five teams how many people would be on each team?
- 6) For homework Gwen had twenty-nine math problems and seven spelling problems. If she can finish nine problems in an hour how long will it take her to finish all the problems?
- 7) Billy was helping the cafeteria workers pick up lunch trays, but he could only carry four trays at a time. If he had to pick up two trays from one table and six trays from another, how many trips will he make?
- 8) Haley was making baggies of cookies with seven cookies in each bag. If she had three chocolate chip cookies and thirty-two oatmeal cookies, how many baggies could she make?
- 9) Tom made two dollars mowing lawns and forty dollars weed eating. If he only spent six dollars a week, how long would the money last him?
- 10) Emily's class is going on a field trip to the zoo. If each van can hold nine people and there are seventeen students and thirty-seven adults going, how many vans will they need?
