Two Step Problems   Name: _____

Solve each problem.

1) Paul was collecting cans for recycling. On Saturday he filled six bags up and on Sunday he filled three more bags. If each bag had seven cans in it, how many cans did he pick up total?

2) Jerry was putting his spare change into piles. He had eight piles of quarters and two piles of dimes. If each pile had six coins in it, how many coins did he have total?

3) Tiffany was unboxing some of her old winter clothes. She found three boxes of clothing and inside each box there were seven scarves and three mittens. How many pieces of winter clothing did Tiffany have total?

4) Oliver and his friend were buying trick decks from the magic shop for seven dollars each. How much did they spend if Oliver bought five decks and his friend bought four decks?

5) Vanessa had five pages of math homework and four pages of reading homework. If each page had five problems on it, how many problems did she have to complete total?

6) Sarah was playing a video game where she scores three points for each treasure she finds. If she found three treasures on the first level and six on the second, what would her score be?

7) Faye was selling her necklaces at a garage sale. She sold three bead necklaces and five gem stone necklaces. If each necklace cost five dollars, how much money did she earn?

8) Mike bought seven boxes of chocolate candy and two boxes of caramel candy. If each box has eight pieces inside it, how much candy did he have total?

9) There were eight friends playing a video game online when two more players joined the game. If each player had five lives, how many lives did they have total?

10) While playing a trivia game, Victor answered five questions correct in the first half and two questions correct in the second half. If each question was worth three points, what was his final score?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

1-10	90	80	70	60	50	40	30	20	10	0
