Imagine a creature with eight hairy legs and a body as big as your hand, that's our friend the tarantula! These spiders are known for their large size, with some species' body reaching up to 4.75 inches and leg span up to 11 inches, making them one of the largest spiders in the world. They have a hard outer body called an exoskeleton, and they molt, or shed their skin as they grow. Their bodies are covered in tiny hairs that they use to sense vibrations in the air or on the ground.

Speaking of these gentle giants, did you know they have quite the appetite? Tarantulas eat a variety of foods, from insects like beetles and grasshoppers to small birds and mice. They don't eat like we do, though. They inject their prey with venom to paralyze it, and then they liquefy their food to drink it up! This might sound a bit creepy, but it's how they survive in the wild.

So, where can you find these fascinating creatures in the wild?

Tarantulas live in a variety of habitats around the world, from deserts to jungles and forests. They make their homes in burrows underground, which they line with silk to keep out predators and weather. While they might seem scary, tarantulas are actually quite shy and would rather run away than fight.

Now you might be wondering, what makes tarantulas different from other spiders? For starters, unlike most spiders, tarantulas don't use webs to catch their prey. They also live much longer than most spiders, with some females living up to 25 years! So next time you see a spider, remember, it could be a tarantula, the gentle giant of the spider world, using its hairy legs to sense the world around it.

Tarantulas

Solv	e each problem.		
Use	the article to answer the question.		
1)	How big can a tarantula's body get?		
	A. Around 2 inches	В.	over 4 inches
	C. Over 6 inches	D.	Not more than 3 inches
2)	Why are tarantulas different from other spide	ers?	
,	A. They are always venomous		They live much longer than most
			spiders
	C. They have more legs	D.	They are vegetarian
3)	What do adult tarantulas eat?		
- )	A. Human skin, blood and hair	B.	Plants, leaves and twigs
	C. Insects, small birds and mice	D.	Adult tarantulas do not eat
4)	What is the lifespan of female tarantulas?		
<b>-</b> )	A. Only 5 years	B.	Up to 25 years
	C. Around 10 years		Not more than 15 years
5)			
5)	How do tarantulas react when they encounter A. They fight back aggressively		Iger? They play dead
	C. They release a bad smell		They try and run away
			They dry and full away
6)	What does a tarantula use to sense vibrations		
	A. Tiny hairs on their bodies		Their eyes
	C. Their eight legs	D.	Their antennae
7)	Where would you NOT find tarantulas in the	wil	d?
	A. Cities		deserts
	C. dry forests	D.	jungles
8)	Where do tarantulas make their homes?		
	A. On leaves	B.	In tree trunks
	C. In large webs they build	D.	In burrows underground
9)	Do tarantulas use webs to catch their prey?		
-)	A. No, they don't use webs to catch their	B.	Yes, they use sticky webs to catch
	prey		their prey
	C. Yes, they use giant webs to catch	D.	Yes, they use complex webs to catch
	their prey		their prey
10)	How do tarantulas protect their homes?		
	A. They build a door of dirt	В.	They cover it with leaves
	C. They hide it with rocks	D.	They line their burrows with silk

## Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

11) "My lifespan is as short as other spiders, around a year or so."

1-10

	Tarantulas Name:
12)	"We tarantulas have a hard outer body called an exoskeleton. As we get older and grow larger we shed our skin!"
13)	"My way to eat is a lot different than yours. Instead of chewing my food, I inject my prey with venom to paralyze it, and then I liquefy their insides and drink it up."
14)	"To detect movements and vibrations, I rely on the tiny hairs that cover my body."
15)	"My species are known for our large size, with some of us even have a leg span as wide as an adult human's face!"
16)	"I've got soft skin."
17)	"Deserts are too hot for me."
18)	"I live much longer than most spiders, some of us females living up to 25 years!"
<b>19</b> )	"I always pick a fight when I see a threat."
20)	"My size is as small as a thumb."
21)	"Some of my species have bodies reaching almost 5 inches and legs spanning up to 11 inches, making us one of the largest spiders!"
22)	"Mice are too big for me to eat, I just eat insects."
23)	"I eat insects like beetles and grasshoppers, and sometimes even small birds and mice."
24)	"I make my home underground in burrows. I line the burrow with silk to keep out unwanted guests and the weather."
25)	"I love to spin webs to catch my prey."
26)	"I'd prefer not to fight. If I can, I'd rather run away."
27)	"You can find me in a variety of habitats around the world, from deserts to jungles and forests."
28)	"My home is in the open fields."
29)	"I don't have any hairs on my body."
Dete	ermine if the statement is a fact or opinion based on the information in the article.
30)	Tarantulas can be found in various habitats around the world, such as deserts, jungles, and forests.
31)	It's amazing how tarantulas can live in so many different habitats around the world.
32)	Tarantulas bodies have tiny hairs to sense vibrations in the air or on the ground.
33)	It's pretty cool that tarantulas are so big and hairy!
34)	The body of a tarantula can reach up to almost 5 inches.
35)	It's amazing how tarantulas live for such a long time even when they are so big.
36)	Some Tarantulas, especially females, have a life span of up to 25 years.
37)	Tarantulas have an exoskeleton, a hard outer body which they molt as they grow.

- **38**) Tarantulas have the most interesting way of eating.
- **39**) Tarantulas are not scary, they are just misunderstood.

## Determine if the statement is true or false.

**40)** Tarantulas do not make webs to catch food.

C. They hide it with rocks D. They line their burrows with silk		-		•

## Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

11) "My lifespan is as short as other spiders, around a year or so."

			I
	Tarantulas	Name:	Answer Key
12)	"We tarantulas have a hard outer body called an exoskeleton. As we get old larger we shed our skin!"	er and grow	N
13)	"My way to eat is a lot different than yours. Instead of chewing my food, I is with venom to paralyze it, and then I liquefy their insides and drink it up."	inject my p	rey
14)	"To detect movements and vibrations, I rely on the tiny hairs that cover my	body."	
15)	"My species are known for our large size, with some of us even have a leg s an adult human's face!"	span as wid	le as
16)	"I've got soft skin."		
17)	"Deserts are too hot for me."		
<b>18</b> )	"I live much longer than most spiders, some of us females living up to 25 ye	ears!"	
<b>19</b> )	"I always pick a fight when I see a threat."		
20)	"My size is as small as a thumb."		
21)	"Some of my species have bodies reaching almost 5 inches and legs spannin inches, making us one of the largest spiders!"	ng up to 11	
22)	"Mice are too big for me to eat, I just eat insects."		
23)	"I eat insects like beetles and grasshoppers, and sometimes even small birds	s and mice.	"
24)	"I make my home underground in burrows. I line the burrow with silk to ke unwanted guests and the weather."	ep out	
25)	"I love to spin webs to catch my prey."		
26)	"I'd prefer not to fight. If I can, I'd rather run away."		
27)	"You can find me in a variety of habitats around the world, from deserts to forests."	jungles and	1
28)	"My home is in the open fields."		
29)	"I don't have any hairs on my body."		
Dete	ermine if the statement is a fact or opinion based on the information in tl	he article.	
30)	Tarantulas can be found in various habitats around the world, such as desert forests.	ts, jungles,	and
31)	It's amazing how tarantulas can live in so many different habitats around the	e world.	
32)	Tarantulas bodies have tiny hairs to sense vibrations in the air or on the gro	und.	
33)	It's pretty cool that tarantulas are so big and hairy!		
34)	The body of a tarantula can reach up to almost 5 inches.		
35)	It's amazing how tarantulas live for such a long time even when they are so	big.	
36)	Some Tarantulas, especially females, have a life span of up to 25 years.		
37)	Terentules have an excelution, a hard outer hody which they malt as they	~**	

- 37) Tarantulas have an exoskeleton, a hard outer body which they molt as they grow.
- **38)** Tarantulas have the most interesting way of eating.
- **39**) Tarantulas are not scary, they are just misunderstood.

## Determine if the statement is true or false.

**40)** Tarantulas do not make webs to catch food.

	Tarar	itulas	Name:	Answer Key					
41)	Tarantulas have a soft outer body.								
42)	Tarantulas have a hard outer body called an exoskeleton.								
43)	Rainforest tarantulas only eat fruits and vegetables.								
44)	Tarantulas paralyze their prey with venom	before they eat.							
45)	Tarantulas makes their home in trees.								
<b>46</b> )	Tarantulas chew their food before they ear	t it.							
47)	Tarantulas are extremely aggressive and p	refer to fight.							
<b>48</b> )	Some tarantulas can live up to 25 years.								
<b>49</b> )	Tarantulas have tiny hairs all over their bo	ody.							
Det	ermine which choice is the expanded forn	n of the underlined contraction.							
<b>50</b> )	They don't eat plants, but instead hunt inse	cts and small animals.							
	A. does not	B. do not							
	C. did not	D. are not							
51)	Tarantulas aren't dangerous to humans, but	t their hairs can cause irritation.							
	A. are not	B. will not							
	C. can not	D. are able							
52)	Tarantulas can't spin webs like other spide	rs.							
	A. can	B. are not able							
	C. will not	D. cannot							
53)	It's important to learn about these fascination	ng creatures.							
	A. it is	B. it has							
	C. it were	D. it was							
54)	They're not as scary as they seem.								
	A. they were	B. they will							
	C. they are	D. they can							
Det	ermine if the sentence is a declarative(d),	exclamatory(e), interrogative(i	) or						
imp	erative(m).								
55)	I can't believe tarantulas can eat birds!								
56)	Don't touch a tarantula without proper sup	pervision!							
57)	How long can tarantulas live?								
58)	Tarantulas can live for so many years, eve	n up to 25 years!							
<b>59</b> )	Tarantulas live in deserts, rainforests, and	mountains.							
60)	Are tarantulas venomous?								
<b>61</b> )	Sama tamatula anasias ann liva un to 25 u								

- 61) Some tarantula species can live up to 25 years or more.
- **62**) Where can tarantulas be found?
- **63)** Tarantulas mainly eat insects and small animals.
- **64)** Be careful, tarantulas have venomous bites.

Name: Answer Key

65) Wow, tarantulas can have a leg span of up to 11 inches!

**66)** Remember to never disturb a tarantula's burrow.

		Tarantulas	Name:	
Solv	ve each problem.			
Use	the article to answer the question			
1)	0 .0			
	A. Around 2 inches	B. over 4 inc	hes	
	C.	D.		
2)	Why are tarantulas different from	other spiders? (paragraph 4)		
	A. They are always venomous	B. They live spiders	much longer than most	
	С.	D.		
3)	What do adult tarantulas eat? (parag	rranh 2)		
2)	A. Human skin, blood and hair	B.		
	C. Insects, small birds and mice	D.		
4)	What is the lifespan of female tar	antulas? (paragraph 4)		
<b>-</b> )	A.	B. Up to 25	vears	
	С.	D.		
5)				
5)	How do tarantulas react when the A.	y encounter danger? (paragra B. They play		
	С.	D. They try a		
6)	What does a tarantula use to sense			
	A. Tiny hairs on their bodies C.	B. D.		
	С.	D.		
7)	Where would you NOT find taran			
	A. Cities	B.		
	C.	D.		
8)	Where do tarantulas make their he	Omes? (paragraph 3)		
	А.	B. In tree tru	nks	
	C.	D. In burrow	s underground	
9)	Do tarantulas use webs to catch th	neir prey? (paragraph 4)		
,	A. No, they don't use webs to cat prey			
	C.	D.		
10)	How do tarantulas protect their ho	omes? (paragraph 3)		
)	A. They build a door of dirt	B.		
	C.	D. They line	their burrows with silk	
-	orming if the statements is somet			

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

11) "My lifespan is as short as other spiders, around a year or so." (paragraph 4)

12) "We tarantulas have a hard outer body called an exoskeleton. As we get older and grow larger we shed our skin!" (paragraph 1)
