

Use rounding strategies to find the sum.

Rather than lining up the place values, one strategy is to round to the highest place value and solve mentally.

**194 + 236 =**

In the example above 194 rounds up to 200. That would make our problem look like:

**200 + 236 =**

Now we can mentally add and find the solution.

**200 + 236 = 436**

But since we added 6 to 194 (to make it 200), now we have to take 6 away.

**436 - 6 = 430**

And now we have our sum.
