Solve each problem.

1) A pet shelter had two puppies when another sixty-two were brought in. If eight puppies a day are adopted, how long would it take for all of them to be adopted?

1. _____

2. _____

2) Will had saved up twenty dollars. If he received another four dollars for his allowance, how many eight dollar toys could he buy?

3. _____

4. _____

3) John was helping the cafeteria workers pick up lunch trays, but he could only carry eight trays at a time. If he had to pick up twenty-two trays from one table and two trays from another, how many trips will he make?

5. _____

6. _____

4) For a birthday party Dave bought ten regular sodas and fourteen diet sodas. If his fridge would only hold six on each shelf, how many shelves would he fill up?

7. _____

8. _____

5) For Halloween Vanessa received nineteen pieces of candy from neighbors and six pieces from her older sister. If she only ate five pieces a day, how long would the candy last her?

9. _____

10. _____

6) Faye's class is going on a field trip to the zoo. If each van can hold nine people and there are twenty-eight students and fifty-three adults going, how many vans will they need?

7) Edward was organizing his baseball cards in a binder with five on each page. If he had seventeen new cards and three old cards to put in the binder, how many pages would he use?

8) For homework Paige had nineteen math problems and two spelling problems. If she can finish seven problems in an hour how long will it take her to finish all the problems?

9) At a company picnic three managers and seven employees decided to start a game of volleyball. If they split into five teams how many people would be on each team?

10) A group of nine friends went into a restaurant. The chef already had two chicken wings cooked but cooked thirty-four more for the group. If they each got the same amount how many would each person get?
