

Determine which choice shows the expression used to solve the problem.

**Answers**

- 1) A group of eight friends were playing a video game. In the game, each player started with six lives. How many lives did they have total?  
A.  $8 + 6$                       B.  $8 - 6$                       C.  $8 \times 6$                       D.  $8 \div 6$
- 2) Paige had to complete two pages of homework. Each page had eight problems on it. How many problems did she have to complete total?  
A.  $2 + 8$                       B.  $8 - 2$                       C.  $2 \times 8$                       D.  $8 \div 2$
- 3) A pet store had fifteen siamese cats. If they sold eight of them, how many cats did they still have?  
A.  $15 + 8$                       B.  $15 - 8$                       C.  $15 \times 8$                       D.  $15 \div 8$
- 4) For Carol's birthday she received fifteen dollars. If she spent nine dollars. How much money did she still have?  
A.  $15 + 9$                       B.  $15 - 9$                       C.  $15 \times 9$                       D.  $15 \div 9$
- 5) Jerry mowed his lawn four times in the spring and seven times in the summer. How many times did he mow total?  
A.  $4 + 7$                       B.  $7 - 4$                       C.  $4 \times 7$                       D.  $7 \div 4$
- 6) A mailman had to give eight pieces of junk mail to all the houses on a block. If the block he's on now has nine houses. How many pieces of junk mail does he need?  
A.  $8 + 9$                       B.  $9 - 8$                       C.  $8 \times 9$                       D.  $9 \div 8$
- 7) Ned was playing basketball with his friend. Ned scored four points and his friend scored five points. How many points did they score total?  
A.  $4 + 5$                       B.  $5 - 4$                       C.  $4 \times 5$                       D.  $5 \div 4$
- 8) At the school Halloween party eight girls and six boys dressed as ghosts. How many people total dressed as a ghost?  
A.  $8 + 6$                       B.  $8 - 6$                       C.  $8 \times 6$                       D.  $8 \div 6$
- 9) Mike is helping to put away books. If he has thirty-five books to put away and each shelf can hold five books how many shelves will he need?  
A.  $35 + 5$                       B.  $35 - 5$                       C.  $35 \times 5$                       D.  $35 \div 5$
- 10) Tom's freezer had ten ice cubes in it. If he had to get ice for two cups, how many pieces should he put in each cup to make them have the same amount?  
A.  $10 + 2$                       B.  $10 - 2$                       C.  $10 \times 2$                       D.  $10 \div 2$
