

**Solve each problem.**

**Answers**

- 1) Gwen had thirty-five homework problems. She finished twenty-six of them but still had three pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?
- 2) Dave was selling his old games. He started out with thirty-three but sold twelve of them. He packed the rest up putting three games into each box. How many boxes did he have to use?
- 3) George bought thirty-three tickets at the state fair. He spent fifteen tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost two tickets, how many rides could he go on?
- 4) Tiffany uploaded one hundred ten pictures to Facebook. She put thirty-eight pics into one album and put the rest into eight different albums. How many pictures were in each of the eight albums?
- 5) Adam made thirty-two dollars mowing lawns over the summer. If he spent eight dollars buying new mower blades, how many eight dollar games could he buy with the money he had left?
- 6) The cafeteria had thirty-five apples. For lunch they handed out twenty-three to students and decided to use the rest to make pies. If each pie takes two apples, how many pies could they make?
- 7) A waiter had nine customers in his section. If five of them left and the rest of his tables had two people at each table, how many tables did he have?
- 8) Emily's team won their baseball game and scored fifty-seven points total. If Emily scored forty-two of the points and everyone else scored three points each, how many players were on her team?
- 9) There are thirty-one students trying out for the school's trivia teams. If sixteen of them didn't get picked for the team and the rest were put into three groups, how many students would be in each group?
- 10) Isabel had twenty files on her computer. She deleted ten of them and put the rest into folders with five files in each one. How many folders did Isabel end up with?
