

**Solve each problem.**

- 1) A worksheet had four problems on it. If a teacher had eleven worksheets to grade and had already graded six of them, how many more problems does she have to grade?
- 2) At a restaurant each adult meal costs \$nine and kids eat free. If a group of eight people came in and six were kids, how much would it cost for the group to eat?
- 3) Vanessa baked seven brownies, but needed twelve total for her party. If she used three spoonfuls of flour on each one, how much cups of flour does she still need?
- 4) Each chocolate bar in a box cost \$four. If a box had five bars total and Paige sold all but two bars, how much money would she have made?
- 5) Edward earned five dollars for each lawn he mowed. If he had eleven lawns to mow, but forgot to mow two of them, how much money did he actually earn?
- 6) April's discount flowers was having a sale where each rose was nine dollars. If April started with ten roses and had six roses left, how much money did she earn?
- 7) Paul bought eleven boxes of chocolate candy and gave six to his little brother. If each box has nine pieces inside it, how many pieces did Paul still have?
- 8) In a video game, each enemy defeated gives you three points. If a level has nine enemies total and you destroy all but six of them, how many points would you earn?
- 9) Kaleb had seven action figures, but needed sixteen total for a complete collection. If each one costs \$four, how much money would he need to finish his collection?
- 10) Emily earned eight points for each bag of cans she recycled. If she had twelve bags, but didn't recycle nine of them, how many points would she have earned?
