

Solve each problem.

- 1) There are thirty-four students going to a trivia competition. If each school van can hold nine students, how many vans will they need?

- 2) Carol had forty-three pennies. She wanted to place the pennies into two stacks, with the same amount in each stack. How many more pennies would she need so all the stacks would be equal?

- 3) A machine in a candy company creates twenty-six pieces of candy a minute. If a small box of candy has seven pieces in it how many full boxes does the machine make in a minute?

- 4) There are twenty-six people attending a luncheon. If a table can hold five people, how many tables do they need?

- 5) Faye had forty-seven songs on her mp3 player. If she wanted to put the songs equally into two different playlists, how many songs would she have left over?

- 6) It takes six apples to make an apple pie. If a chef bought twenty-three apples, the last pie would need how many more apples?
