Imagine a creature that's as light as a feather, with vibrant orange wings and spots that look like tiny suns - let's talk about the magical Monarch butterfly! These magnificent insects are quite a sight with their large wings that are a brilliant shade of orange, laced with black lines and bordered with white dots. They're not just pretty faces though, they are also one of the largest butterflies, and can have a wingspan of nearly 5 inches. Next time you see one, try to spot the difference between a Monarch and other butterflies!

Did you know that Monarchs have a royal taste for a particular plant? These butterflies mainly eat milkweed, a plant which is poisonous to most animals, but not our Monarch friends. The milkweed does more than just fill their bellies, it also helps them stay safe from predators who don't like the taste of the poisonous plant. Let's find out where our butterfly buddies hang out and live.

Just like how we love to travel for summer vacations, Monarchs have their own version of a road trip. They migrate thousands of miles every year from North America to Mexico for the winter, and then return home in the spring. While on this epic journey, they lay eggs on milkweed plants that hatch into caterpillars, transform into a chrysalis, and finally emerge as a new butterfly to continue the cycle. Now, you might be wondering how we humans interact with these flying beauties.

Page 1 of 5

We humans have a special relationship with Monarchs, as we love to watch them and they help us too. They help pollinate plants by carrying pollen from one plant to another while they are searching for nectar. However, Monarchs need our help to survive as their habitats are often threatened by human activities. So remember, these magical creatures are more than just beautiful, they play a crucial role in our ecosystem.

Monarch Butterflies

#### Solve each problem.

	the article to answer the question.	<b>C1 C</b>	
I)	What color are the wings of a Monarch butter	•	
	A. green		orange
	C. red	D.	blue
2)	Why do Monarchs need our help?		
	A. Human pets are eating many of them	B.	They are being caught by too many children
	C. Their habitats are threatened by human activities	D.	They are dying because of human disease
3)	What do Monarch caterpillars transform into	?	
	A. a chrysalis	В.	a flower
	C. a cocoon	D.	another caterpillar
4)	Where do Monarch butterflies lay their eggs?	,	
-	A. in tree trunks		under rocks
	C. on flowers		on milkweed plants
			-
5)	What color are the spots on Monarch butterfly	-	-
	A. white		pink
	C. green	D.	black
6)	What is the main food of Monarch butterflies	?	
	A. milkweed	В.	flowers
	C. grass	D.	leaves
7)	Where do Monarchs migrate to for the winter	·?	
,	A. California		Canada
	C. Florida	D.	Mexico
8)	What do Monarch butterflies do in the spring	9	
0)	A. build nests and lay eggs		hibernate in caves
	C. return home after migrating		head further south to South America
9)	What is the size of a Monarch butterfly's win	<b>·</b> ·	
	A. one inch		nearly 5 inches
	C. two feet	D.	ten inches
10)	What role do Monarchs play in pollination?		
	A. carry pollen from one plant to another	В.	make honey for other insects
	C. help plants by spreading seeds	D.	eat plants for nourishment

# Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

**11)** "During my migration I lay eggs on milkweed plants. These hatch into caterpillars, transform into a chrysalis, and then become new butterflies."

(paragraph 3) <ul> <li>A. build nests and lay eggs</li> <li>B.</li> </ul> </li> </ul>	
<ul> <li>A. milkweed B. flowers D.</li> <li>7) Where do Monarchs migrate to for the winter? (paragraph 3)</li> <li>A. California B.</li> <li>C. D. Mexico</li> <li>8) What do Monarch butterflies do in the spring? (paragraph 3)</li> <li>A. build nests and lay eggs B.</li> </ul>	
<ul> <li>C. D.</li> <li>7) Where do Monarchs migrate to for the winter? (paragraph 3) <ul> <li>A. California</li> <li>C.</li> </ul> </li> <li>8) What do Monarch butterflies do in the spring? (paragraph 3) <ul> <li>A. build nests and lay eggs</li> <li>B.</li> </ul> </li> </ul>	
<ul> <li>7) Where do Monarchs migrate to for the winter? (paragraph 3) <ul> <li>A. California</li> <li>B.</li> <li>C.</li> <li>D. Mexico</li> </ul> </li> <li>8) What do Monarch butterflies do in the spring? (paragraph 3) <ul> <li>A. build nests and lay eggs</li> <li>B.</li> </ul> </li> </ul>	
<ul> <li>A. California</li> <li>C.</li> <li>B.</li> <li>D. Mexico</li> </ul> 8) What do Monarch butterflies do in the spring? (paragraph 3) <ul> <li>A. build nests and lay eggs</li> <li>B.</li> </ul>	
<ul> <li>C. D. Mexico</li> <li>8) What do Monarch butterflies do in the spring? (paragraph 3)</li> <li>A. build nests and lay eggs</li> <li>B.</li> </ul>	
<ul><li>8) What do Monarch butterflies do in the spring? (paragraph 3)</li><li>A. build nests and lay eggs</li><li>B.</li></ul>	
A. build nests and lay eggs B.	
C. return nome after migrating D.	
9) What is the size of a Monarch butterfly's wingspan? (paragraph 1)	
A. one inch B. nearly 5 inches	
C. D.	
<b>10</b> ) What role do Monarchs play in pollination? (paragraph 4)	
A. carry pollen from one plant to another B. make honey for other insects	
C. D.	

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

## Monarch Butterflies

Name:

- **11**) "During my migration I lay eggs on milkweed plants. These hatch into caterpillars, transform into a chrysalis, and then become new butterflies." (paragraph 3)
- 12) "I don't mind which plant I eat, they're all tasty!" (paragraph 2)
