

**Solve each problem.****Answers**

- 1) Henry was checking how much power his lights used. His first light by itself used 92.56 amps. When he turned on the second light, together they used 192.06 amps. How many amps did just the second light use?
- 2) Frank and Sarah were comparing the distance they ran over a week. If Frank ran 18.23 miles and Sarah ran 20.4 miles, how far did they run total?
- 3) Billy ate a snack with 85.26 total calories. If the chips he ate were 42.66 calories, how many calories were in the rest of his snack?
- 4) Carol was measuring how much taller she got over two years. In the first year she grew 5.22 cm. In the second year she grew 10.6 cm. How much taller did she get altogether?
- 5) Tom walked 4.29 kilometers during the two days he was at the fair. One the first day he walked 1.59 kilometers. How far did he walk the second day?
- 6) Luke was making some brownies and cupcakes for his school fundraiser. If the brownies needed 2.80 cups of sugar and the cupcakes needed 2.3 cups, how much sugar would he need altogether?
- 7) A computer programmer had two files with a total size of 90.65 gigabytes. If one of the files was 43.25 gigabytes, how big is the second file?
- 8) Debby was trying to put some files on her flash drive. If she had one file that was 4.94 mb and another file that was 4.8 mb what is their combined file size?
- 9) Paige was checking the weight of a gold nugget and a piece of fool's gold. Together they weighed 95.28 grams. If the fool's gold was 22.38 grams, how much did the gold nugget weigh?
- 10) A weatherman was measuring the amount of rain two cities received over a week. City A received 1.2 inches while City B received 2.7 inches. How much rain did they get total?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
