

Use '>', '<' or '=' to compare the fractions.

Ex)  $\frac{1}{4} < \frac{5}{6}$

1)  $\frac{9}{12} > \frac{1}{4}$

2)  $\frac{2}{5} < \frac{10}{12}$

3)  $\frac{5}{8} > \frac{1}{3}$

4)  $\frac{3}{12} < \frac{7}{10}$

5)  $\frac{2}{6} < \frac{3}{4}$

6)  $\frac{3}{8} < \frac{4}{6}$

7)  $\frac{3}{12} = \frac{2}{8}$

8)  $\frac{6}{12} > \frac{2}{8}$

9)  $\frac{5}{6} > \frac{2}{8}$

10)  $\frac{5}{8} < \frac{2}{3}$

11)  $\frac{7}{12} < \frac{4}{6}$

12)  $\frac{4}{5} > \frac{2}{12}$

13)  $\frac{1}{6} < \frac{2}{4}$

14)  $\frac{4}{8} < \frac{2}{3}$

15)  $\frac{2}{5} > \frac{1}{3}$

16)  $\frac{5}{6} > \frac{1}{4}$

17)  $\frac{1}{10} < \frac{7}{12}$

18)  $\frac{5}{6} > \frac{4}{12}$

19)  $\frac{2}{3} > \frac{5}{10}$

20)  $\frac{4}{5} > \frac{4}{12}$

**Answers**

Ex.           <          

1.           >          

2.           <          

3.           >          

4.           <          

5.           <          

6.           <          

7.           =          

8.           >          

9.           >          

10.           <          

11.           <          

12.           >          

13.           <          

14.           <          

15.           >          

16.           >          

17.           <          

18.           >          

19.           >          

20.           >
