

## Determining Change - One Cost , One Item

Name: \_\_\_\_\_

Solve each problem.

- 1) Victor purchased a model airplane kit for \$6.20. He gave the shopkeeper 20 dollars. Calculate the change to be returned.
  
- 2) During her vacation, Katie bought a beach ball for \$2.60. She gave the vendor 20 dollars. What amount of change should she get?
  
- 3) In a toy store, Robin chose a puzzle priced at \$5.05. She gave the cashier 20 dollars. How much change will she receive?
  
- 4) George went shopping for new sneakers. The price was \$8.65, and he paid with 20 dollars. Determine the change he will get back.
  
- 5) For her art project, Rachel bought a set of markers costing \$4.95. She paid with 20 dollars. What is the change?
  
- 6) Cody paid 20 dollars for a pair of socks priced at \$2.40. How much change does he get?
  
- 7) Roger at a garage sale, found a vintage lamp for \$7.15. He gave the cashier 20 dollars. Calculate the change he should receive.
  
- 8) At a bakery, Debby bought a box of cupcakes priced at \$2.80. She paid with a 20 dollar bill. How much change should she receive?
  
- 9) Jerry at the carnival, won a game and decided to buy a toy car for \$2.50. He paid 20 dollars for it. How much change is he owed?
  
- 10) Olivia bought a water bottle for \$3.50 pennies. After paying with 20 dollars, how much change is she owed?
