Solve each problem.

1) Bianca's class is going on a field trip to the zoo. If each van can hold seven people and there are twenty-four students and four adults going, how many vans will they need?

2) The school's baseball team had five new players and twenty-three returning players. If the coach put them into groups with four players in each group, how many groups would there be?

3) Jerry had saved up two dollars. If he received another sixteen dollars for his allowance, how many six dollar toys could he buy?

4) Carol and her friends were recycling paper for their class. For every four pounds they recycled they earned 1 point. If Carol recycled nine pounds and her friends recycled seven pounds, how many points did they earn?

5) For a birthday party George bought eighteen regular sodas and forty-five diet sodas. If his fridge would only hold seven on each shelf, how many shelves would he fill up?

6) A vase can hold four flowers. If you had twelve carnations and twelve roses, how many vases would you need to hold the flowers?

7) Sarah was making baggies of cookies with seven cookies in each bag. If she had thirty-eight chocolate chip cookies and eighteen oatmeal cookies, how many baggies could she make?

8) For homework Emily had fourteen math problems and four spelling problems. If she can finish nine problems in an hour how long will it take her to finish all the problems?

9) Frank was organizing his baseball cards in a binder with five on each page. If he had four new cards and eleven old cards to put in the binder, how many pages would he use?

10) For Halloween Faye received forty-two pieces of candy from neighbors and twenty-two pieces from her older sister. If she only ate eight pieces a day, how long would the candy last her?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____
