

Solve each problem.

**Answers**

- 1) Amy and her friends were recycling paper for their class. For every nine pounds they recycled they earned 1 point. If Amy recycled twenty-two pounds and her friends recycled fourteen pounds, how many points did they earn?
- 2) Paul made forty-seven dollars mowing lawns and sixteen dollars weed eating. If he only spent nine dollar a week, how long would the money last him?
- 3) For Halloween Gwen received twenty-five pieces of candy from neighbors and twenty pieces from her older sister. If she only ate five pieces a day, how long would the candy last her?
- 4) At a company picnic forty managers and sixteen employees decided to start a game of volleyball. If they split into seven teams how many people would be on each team?
- 5) A toy store had fifty giant stuffed bears in stock when they got another shipment with thirteen bears in it. The put the bears onto shelves with nine on each shelf. How many shelves did they use?
- 6) For homework Nancy had seventeen math problems and three spelling problems. If she can finish five problems in an hour how long will it take her to finish all the problems?
- 7) While playing at the arcade, Cody won seven tickets playing 'whack a mole' and thirty-eight tickets playing 'skee ball'. If he was trying to buy candy that cost five tickets a piece, how many could he buy?
- 8) Kaleb was organizing his baseball cards in a binder with five on each page. If he had five new cards and five old cards to put in the binder, how many pages would he use?
- 9) Sarah uploaded four pictures from her phone and fifty-two from her camera to Facebook. If she sorted the pics into eight different albums with the same amount of pics in each album, how many pictures were in each of the albums?
- 10) Adam had saved up six dollars. If he received another six dollars for his allowance, how many six dollar toys could he buy?
