

Solve each problem.

**Answers**

- 1) Katie was selling her necklaces at a garage sale. She sold eight bead necklaces and two gem stone necklaces. If each necklace cost four dollars, how much money did she earn?
- 2) While playing a trivia game, Henry answered four questions correct in the first half and three questions correct in the second half. If each question was worth six points, what was his final score?
- 3) Emily had seven pages of math homework and two pages of reading homework. If each page had nine problems on it, how many problems did she have to complete total?
- 4) April's discount flowers was having a sale where each flower was eight dollars. If Janet bought two roses and eight daisies, how much did she spend?
- 5) At Will's Restaurant a group with seven adults and three children came in to eat. If each meal cost six dollars, how much was the bill?
- 6) Faye bought three new chairs and five new tables for her house. If she spent six minutes on each piece furniture putting it together, how many minutes did it take her to finish?
- 7) At the town carnival Jerry rode the ferris wheel six times and the bumper cars four times. If each ride cost three tickets, how many tickets did he use?
- 8) While shopping for music online, Amy bought eight country albums and two pop albums. Each album came with a lyric sheet and had seven songs. How many songs did Amy buy total?
- 9) Mike was collecting cans for recycling. On Saturday he filled seven bags up and on Sunday he filled two more bags. If each bag had six cans in it, how many cans did he pick up total?
- 10) Billy was working as a sacker at a grocery store where he made seven dollars an hour. On Monday he worked three hours and on Tuesday he worked seven hours. How much money did Billy make in those two days?
