## Solve each problem.

Answers

1) Jerry had to wash five short sleeve shirts and thirteen long sleeve shirts before school. If he had only washed two of them by the time school started, how many did he not wash?
2) Luke had forty-five dollars. For his birthday he got thirty-two more dollars but spent thirty-three on a new game. How much money does he have now?
3) Bianca had four math problems and forty-three science problems for homework. If she finished twenty-two of the problems at school, how many problems did she have to do for homework?
4) The school cafeteria ordered ten red apples and forty-three green apples for student's lunches. But, if only fifteen students wanted fruit, how many extra did the cafeteria end up with?
5) Faye and her mom were picking carrots from their garden. Faye picked twenty-six and her mother picked twenty-four. If only thirty-eight of the carrots were good, how many bad carrots did they have?
6) Rachel bought two coloring books. One had eleven pictures and the other had twenty-two. After one week she had already colored eleven of the pictures. How many pictures does she still have to color?
7) Nancy was playing a trivia game. In the first round she scored forty-three points and in the second round she scored two points. In the last round she lost eight points. How many points did she have at the end of the game?
8) While shopping, Katie bought thirty-six green towels and two white towels. If she gave her mother sixteen of them, how many towels did Katie end up with?
9) For Halloween Janet and her sister combined the candy they received. Janet had three pieces of candy while her sister had forty-one. If they ate forty pieces the first night, how many pieces do they have left?
10) At the arcade, Dave won thirty tickets playing 'whack a mole' and fifteen tickets playing 'skee ball'. If he spent thirty-one of his tickets on a hat, how many tickets does Dave have left?
