

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) At the fair Tom rode two rides the first day he went and nine rides the second day. How many times did he ride total?  
A.  $2 + 9$                       B.  $9 - 2$                       C.  $2 \times 9$                       D.  $9 \div 2$
- 2) Sarah was buying soap for her bathroom. She bought three packs with each pack having four bars. How many bars of soap did she buy?  
A.  $3 + 4$                       B.  $4 - 3$                       C.  $3 \times 4$                       D.  $4 \div 3$
- 3) There are eleven different books in the 'Crazy Silly School' series. If you read two of the books, how many more do you still have to read?  
A.  $11 + 2$                       B.  $11 - 2$                       C.  $11 \times 2$                       D.  $11 \div 2$
- 4) Amy was placing her spare change into stacks. One stack had five coins and the other had seven. How many coins did she have total?  
A.  $5 + 7$                       B.  $7 - 5$                       C.  $5 \times 7$                       D.  $7 \div 5$
- 5) John was packing up his old toys. He has forty-eight toys to pack up and can fit eight in each box. How many boxes will he need?  
A.  $48 + 8$                       B.  $48 - 8$                       C.  $48 \times 8$                       D.  $48 \div 8$
- 6) Carol collected eight cans for recycling. If she put five cans in one bag how many cans did she have left?  
A.  $8 + 5$                       B.  $8 - 5$                       C.  $8 \times 5$                       D.  $8 \div 5$
- 7) Roger was helping his mom wash clothes. They washed eight short sleeve shirts and three long sleeve shirts. How many shirts did they wash total?  
A.  $8 + 3$                       B.  $8 - 3$                       C.  $8 \times 3$                       D.  $8 \div 3$
- 8) Paul's freezer had thirty-two ice cubes in it. If he had to get ice for eight cups, how many pieces should he put in each cup to make them have the same amount?  
A.  $32 + 8$                       B.  $32 - 8$                       C.  $32 \times 8$                       D.  $32 \div 8$
- 9) Maria bought five music albums online. If each album had three songs, how many songs did she buy total?  
A.  $5 + 3$                       B.  $5 - 3$                       C.  $5 \times 3$                       D.  $5 \div 3$
- 10) Katie uploaded twelve pics to Facebook. If she put the pics into four albums with the same number of photos in each album, how many photos were in each album?  
A.  $12 + 4$                       B.  $12 - 4$                       C.  $12 \times 4$                       D.  $12 \div 4$
