

Solve each problem.

Answers

- 1) A waiter had seventy-eight customers in his section. If thirty of them left and the rest of his tables had six people at each table, how many tables did he have?
- 2) Kaleb bought thirty-eight tickets at the state fair. He spent eight tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost five tickets, how many rides could he go on?
- 3) There are thirty-four students trying out for the school's trivia teams. If twenty-six of them didn't get picked for the team and the rest were put into two groups, how many students would be in each group?
- 4) Robin picked eighty-six flowers for her friend's wedding. She was making bouquets with nine flowers in each one. If fourteen of the flowers wilted before the wedding, how many bouquets could she still make?
- 5) Victor had ninety-one dollars. If he spent forty-three bucks on a new game, how many six dollar toys could he buy with the money he had left?
- 6) The cafeteria had one hundred six apples. For lunch they handed out forty-three to students and decided to use the rest to make pies. If each pie takes seven apples, how many pies could they make?
- 7) Sam was selling his old games. He started out with sixty-two but sold forty-seven of them. He packed the rest up putting three games into each box. How many boxes did he have to use?
- 8) Haley had eighty-one files on her computer. She deleted forty-nine of them and put the rest into folders with four files in each one. How many folders did Haley end up with?
- 9) Debby was planting vegetables in her garden. She started with forty-seven seeds and planted fifteen of them in the big garden and in each of her small gardens put four seeds each. How many small gardens did Debby have?
- 10) Carol baked seventy-one cupcakes for her school's bake sale. If her brother, Todd, ate twenty-three of them how many packages could she make if she put eight cupcake in each package?
