Rewriting Equations

Rewrite each number sentence using numerals and symbols.

Answers

1) The difference between nine and N is seven

2) The product of six and P is fifty-four

3) E divided by ten equals ten

4) The sum of nine and C is seventeen

5) The difference between four and W is two

6) D times six equals fifty-four

7) one hundred divided by Z equals ten

8) The sum of one and T is three

9) nine minus A equals three

10) K times three equals twelve

11) B divided by ten equals ten

12) H plus four equals seven

13) eight minus Y equals five

14) G times four equals twenty-eight

15) one hundred divided by F equals ten

16) two plus B equals eight

17) six minus A equals three

18) eight times J equals sixty-four

19) one hundred divided by U equals ten

20) The sum of R and three is thirteen

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

11. _____

12. _____

13. _____

14. _____

15. _____

16. _____

17. _____

18. _____

19. _____

20. _____

1-10	95	90	85	80	75	70	65	60	55	50
11-20	45	40	35	30	25	20	15	10	5	0

Rewrite each number sentence using numerals and symbols.

1) The difference between nine and N is seven

1. $9 - N = 7$

2) The product of six and P is fifty-four

2. $6 \times P = 54$

3) E divided by ten equals ten

3. $E \div 10 = 10$

4) The sum of nine and C is seventeen

4. $9 + C = 17$

5) The difference between four and W is two

5. $4 - W = 2$

6) D times six equals fifty-four

6. $D \times 6 = 54$

7) one hundred divided by Z equals ten

7. $100 \div Z = 10$

8) The sum of one and T is three

8. $1 + T = 3$

9) nine minus A equals three

9. $9 - A = 3$

10) K times three equals twelve

10. $K \times 3 = 12$

11) B divided by ten equals ten

11. $B \div 10 = 10$

12) H plus four equals seven

12. $H + 4 = 7$

13) eight minus Y equals five

13. $8 - Y = 5$

14) G times four equals twenty-eight

14. $G \times 4 = 28$

15) one hundred divided by F equals ten

15. $100 \div F = 10$

16) two plus B equals eight

16. $2 + B = 8$

17) six minus A equals three

17. $6 - A = 3$

18) eight times J equals sixty-four

18. $8 \times J = 64$

19) one hundred divided by U equals ten

19. $100 \div U = 10$

20) The sum of R and three is thirteen

20. $R + 3 = 13$

1-10	95	90	85	80	75	70	65	60	55	50
11-20	45	40	35	30	25	20	15	10	5	0
